

ROBOT PALLETIZER

Application

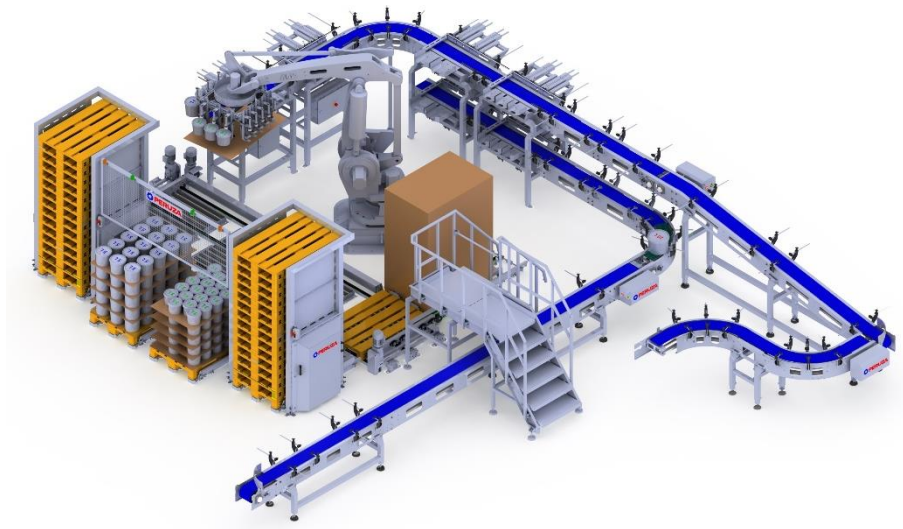

Palletizer robot is designed as high capacity various product palletizing. Equipment can process up to 500 units per minute.

Palletizer robot can handle various dimension packages.

Equipment is used for various size carton, glass, plastic palletizing purposes.

Main benefits

- Only one operator can palletize up to 500 units per minute
- Self adjustable between predefined products
- Can achieve various predefined layer patterns
- Adapts to available workspace

Operating principle

PERUZA palletizer robot provides palletizing of incoming unit lines onto two palletes simultaneously.

Equipment provides with spacer and pallet delivering to robot palletizing area.

It palletizes units to palletes using advance gripping mechanisms.

Processing capacity

  	ROBOT PALLETIZER (units/min)
Small carton	up to 500
Medium plastic	up to 300
Large glass	up to 100

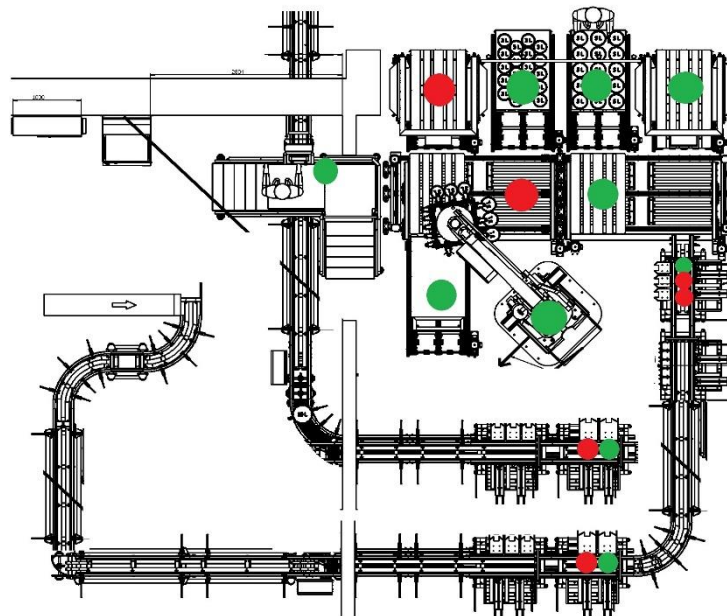

*Equipment is adaptable to various size and weight dimensions

See equipment in action:

Technical characteristics

Product	Bottles, trays, cases... etc
Processing capacity	Up to 500 units per minute
Size of processed product	Depends on client needs
Equipment dimension (LxWxH)	Adjustable by needs and available workspace
Number of operators on the machine	0-1
Key features	User friendly interface, easy to add new kinds of product units
