

REDUCED GIVEAWAY LINE

Application

Reduced giveaway line is designed for raw product automatic insertion into plastic trays, thermoformed packages or boxes by reaching specified final weight range.

Reduced giveaway means increased profitability.

Precise calculations reduce the giveaway of the product and increase the line capacity.

Main benefits

- Reduced product giveaway
- Easy to use user interface
- Adaptable to various products
- Fast operating
- Can be connected to most of traysealers or thermoformers

Operating principle

The products arrive on main product conveyor one by one in 1, 2 or more lanes.

After passing through 3D dimension recognition and weight calculation unit, program sends signal to robot with appropriate gripper to pick it up and place it into a tray or box to reach set final weight range in packaging.

Final weight range in packaging and current line setup can be adjusted in a smart user interface.
